

PORTABLE JUMPSTART MACHINE

Our Patented Technology Ensures Successful Starts

CAPS™

CAPACITOR ACTUATED PORTABLE STARTER
POWERFUL AND PORTABLE

The CAPS is a powerful, portable, and versatile solution that can be used to jumpstart both heavy- and light-duty 12 V vehicles.

The CAPS is:

Quick — Our innovative electronics jumpstart vehicles fast, as well as recharge quickly after successful jumpstarts if left connected for only a few minutes.

Powerful — An ultracapacitor and small AGM battery allow the CAPS to perform multiple jumpstarts without being recharged.

Efficient — A lightweight and portable design makes the CAPS easy to maneuver in tight areas and reach multiple vehicles in a short amount of time.
